

AMENDMENTS TO THE CLAIMS

1-10. (canceled)

11. (new) A turf cultivator comprising:

a frame adapted for pulling behind a vehicle;

a plow and fertilizer assembly attached to said frame

wherein said plow and fertilizer assembly comprises:

a forward projecting space forming edge capable of lifting
sod;

a plate capable of receiving said sod and further lifting
said sod;

a plow shank above said plate capable of splitting said
sod;

a diverging plate extending rearward from said space
forming edge to a rear vent;

a hopper capable of providing material to said rear vent
wherein said material is distributed over a width of
said rear vent.

12. (new) The turf cultivator of claim 11 further comprising an
air tube terminating at said rear vent capable of
dispersing said material over said width of said rear vent.

- 13.(new) The turf cultivator of claim 12 wherein said air tube traverses through said plow and fertilizer assembly.
- 14.(new) The turf cultivator of claim 11 further comprising teeth attached to an underside of said plow and fertilizer assembly.
- 15.(new) The turf cultivator of claim 11 further comprising at least one roller attached to said frame and rearward of said rear vent.
- 16.(new) The turf cultivator of claim 11 further comprising a platform attached to said frame for a person to ride on said platform during operation.
- 17.(new) A turf cultivator comprising:
- a frame adapted for pulling behind a vehicle comprising:
 - a forward projecting space forming edge capable of lifting sod attached to said frame;
 - a flat plate capable of receiving said sod and further lifting said sod;
 - a plow shank above said plate capable of splitting said sod;
 - a diverging plate extending rearward from said space forming edge to a rear vent;

a hopper capable of providing material to said rear vent
wherein said material is distributed over a width of
said rear vent; and
an air tube terminating at said rear vent capable of
dispersing said material over said width of said rear
vent.

18.(new) The turf cultivator of claim 17 further comprising
teeth attached to an underside of said plow and fertilizer
assembly.

19.(new) The turf cultivator of claim 17 wherein said air tube
traverses through said plow and fertilizer assembly.

20.(new) The turf cultivator of claim 16 further comprising at
least one roller attached to said frame and rearward of
said rear vent.

21.(new) The turf cultivator of claim 17 further comprising a
platform attached to said frame for a person to ride on
said platform during operation.
